

BUDGET COMPARISON CALCULATOR

Every posting brings new financial challenges, and knowing what your monthly expenses will be can help alleviate some of the mental and financial stress.

Below is a table to help you plan your family budget from one location to the next.

- The first column is a list of common income and expense categories.
- The second column is where you input your current budget information – what you spend in your current location.
- The next column is an estimate of the income and expenses you will incur at your new destination.
- The final column tallies the difference.

You can compare your budget at the two locations as see where adjustments may need to be made as a result of your move (and if you can fit in a nice dinner out now and then!)

Budget Calculator - Origin vs Destination

INCOME				
	Current Monthly Budget (Origin City)	Future Monthly Budget (Destination City)	Difference	
Spouse 1 monthly net income	\$ -	\$ -	\$	-
